\$200 Commercial Grade

Budget TALKS begin in July -

Nursery - Future Projects

Richard felt we should list Events -

Garage - Circus - 4th of July - Federal Holidays
Same as downtown + Yard Sales & Giant Fest

JUNE PARKS REPORT 2010

Parks dept. has been mowing all parks once a week along with trimming and weeding as needed. We have purchased 80 yards of double shredded hard wood mulch for all of the parks for \$18.50 yd. bulk/no cost to ship total for this purchase was \$1480. This should last the parks dept. for two years; we will cover and store the rest for next years use.

The parks dept. has cut the following delinquent properties this month: parcel # 012-21A-13-220 / # 021-21A-13-219 / # 012-21A-16-139 / #012-21A-16-138 / # 012-21A-16-159 these have been turned into the zoning inspector's office.

#35 Pol
each time

We trimmed all of the lower braches off trees at the library and Stan hope park due to them hanging so low.

The baseball association is still spraying the ball diamonds and around the general area with weed killer. I gave them one gallon of 'strike out' last month but it is a concentrate one tsp. to one gal. H2o this is a product that we had on hand to do the job; the MSDS is on site at our facility.

We cleaned up all of the flowerbeds around the downtown area pulling all weeds and putting new mulch down including the council bldg.

Mandarin Drive
water issue

The girl scouts finished there project at the Stan hope park the flowers look great!

We continue to pick up the trash barrels at all parks three times a week due to the increased parks use and the bees....

Dale Sidle the owner of valley view spray service made the first application to the village concentrating on the problem areas for mosquito control through the village.

We set out more trash barrels around the parks for the yard sale; we had minimal damage this year to any of the lawns...

Yard sale Success 2010

Paid all bills for the department.
